Securing Against **Operational Disruptions**
caused by **Cyber Threats, Malicious Insiders and**
Human Error, by providing **Visibility and Control**
to industrial networks.

Visibility in the Operational Network

- Lack of management and security tools
- Lack of visibility and control

The Indegy Industrial Cyber Security Platform

Visibility and Control for ICS Networks

- **Software solution, delivered as a turn-key appliance**
- **Agentless, Non intrusive**
- **Monitors ICS Network Activity**
 - Data-Plane: Process Parameters
 - Control-Plane: Engineering Activities
- **Captures all changes to industrial controllers**
 - Over the network or local on the physical device
 - Authorized or unauthorized

Why Indegy?

Improving operational continuity, safety and reliability by providing real-time situational awareness and security for industrial control networks

- ✓ Patent pending ICS monitoring technology inspects critical control-layer activities
- ✓ Unique combination of cyber security and operational benefits
- ✓ Low-Touch network deployment doesn't disrupt operations

About

Team

Decades of hands on experience with cyber security of industrial control systems. Indegy Labs research team drawn from Israeli Defense Forces' elite cyber security agencies.

Infrastructure

Advanced ICS laboratory and test bed including a wide variety of PLCs, RTUs and IEDs.

Board Members

Shlomo Kramer

Security industry visionary, member of the InfoSec Hall of Fame, Founder of Check Point (CHKP) & Imperva (IMPV).

Yahal Zilka

Co-Founder and Managing partner, Magma Venture Partners.

Advisory Board

Gen (ret.) Amos Yadlin, Former Head Of Intelligence, IDF

Amichai Shulman, Founder & CTO, Imperva

Mark Kraynak, CPO, Imperva
